

WITH PRECISION TO HIGH-PERFORMANCE

Your specialist for the development and production of precision components made from high-performance plastics

Processing of high-performance plastics such as PPS, PPA or PEEK

- Temperature resistant up to 240° (PPS) or 260° (PEEK)
- Highly resistant to acids, bases, solvents, and oils
- High rigidity and tensile strength
- PEEK is very tough and impact-resistant
- Stable even in humid environments
- Flame-retardant (fire rating V-0 according to UL 94)
- Excellent electrical insulation properties, even at high temperatures
- By adding special additives, the plastics can also be made conductive
- Used as a cost-effective metal substitute (e.g. instead of aluminum)

FULL-SERVICE- INJECTION MOLDING SPECIALIST with over 30 years of experience

- Production of small to large-scale series for various industries
- Experienced engineering team for development, design, and product engineering
- In-house mold and toolmaking
- Precision and hybrid injection molding (e.g. insert molding)
- Assembly of components
- Global logistics and after-sales support
- We are Europe's PPS champion – processing over 700 tons of granulate into more than 60 million parts per year

Top quality: MADE IN GERMANY

- Part of a family-owned company with more than 75 years of tradition
- Consistent quality management across all processes – ISO 9001 / IATF 16949
- High environmental protection standards according to ISO 14001
- Cooperations with accredited testing and measuring laboratories
- High level of automation in production
- 100% manufacturing in Germany
